

Engineering Design and Assessment

Imenco provides complete
cathodic
protection systems

Imenco has produced ROV installable Retrofit Anode Systems since 1999, which have proved to be very effective and installation friendly. The smart solution cater for compact design, enabling great flexibility in anode attachments.

Engineering Design and Assessment

Imenco provides design and assessment of cathodic protection systems. By providing design and simulation capability, we enable engineers to design, assess and optimize cathodic protection systems. This service is not only suited for new-builds, but also for midlife retrofit and through to decommissioning. Imenco's Cathodic Protection Systems and mechanical engineering, will assure the continuous protection of your assets at the lowest possible cost.

Protection systems. Our design and simulation capability enables engineers to design, assess and optimise cathodic protection systems, for new-build, mid-life retrofit and through to decommissioning. Based on our quality retrofit products and mechanical engineering, Imenco will assure the continuous protection of your assets at the lowest possible cost.

Services

- Performance assessments of installed CP systems
- ITA and optimisation of CP system configurations
- Concept design of ICCP and sacrificial systems
- Cost-benefit assessments of various cathodic protection solutions
- Assessment of human factors on operating procedures and practices of cathodic protection systems
