

Customer feedback

This letter confirms our long-standing collaboration with **Imenco Corrosion Technology AS** as a trusted supplier of **Retrofit Cathodic Protection and Electrical Continuity Clamping solutions**.

For several decades, Imenco has provided Equinor with reliable products and services, including **retrofit CP clamps and anodes**, which have been installed and operated successfully across a number of our offshore installations.

Notable business cases where Imenco's solutions have been delivered to Equinor include:

- **Retrofit Cathodic Protection projects** on mature offshore fields, ensuring extended asset lifetime.
- **Electrical continuity clamping solutions** on subsea structures to safeguard integrity and operational reliability.
- **Tailored engineering support** in challenging retrofit operations, where Imenco's expertise has proven critical.

Throughout these projects, Imenco has demonstrated consistent quality, technical/operational competence, and responsiveness, making them a valued and reliable partner for Equinor.

We can recommend Imenco as a trustworthy supplier of subsea Retrofit Cathodic Protection/ Electrical Continuity Clamping solutions and CP engineering services based on our positive experience over the years.

Stavanger 5. September 2025

Sincerely,

Nils Olav Ågotnes
